Annexure-I

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

For the Financial Year Ended 31st March 2025

The Indian steel industry continues to be one of the core sectors underpinning the nation's manufacturing and infrastructure development. Supported by the Government's thrust on infrastructure creation and industrial expansion, the sector has shown resilience amid global economic uncertainties. The National Steel Policy 2017 aims to boost India's steel production capacity to 300 million tonnes by 2030–31 (–Ministry of Steel NSP 2017), while reducing import dependency and encouraging value-added domestic manufacturing. This policy, along with initiatives such as Make in India, PM Gati Shakti, and the National Infrastructure Pipeline (111 lakh crore outlay) (Ministry of Finance), is expected to drive long-term steel demand across sectors like construction, automotive, energy, and defence.

India's crude steel production stood at 140.2 million tonnes in FY 2023–24 (–World Steel Association April 2024 Short Range Outlook), and domestic demand is projected to grow at 7.5% in FY 2025 ([SteelMint Report, March 2025]). Despite global slowdown pressures, India remains one of the few bright spots globally in terms of both production and consumption.

Kanishk Steel Industries Limited, established in 1989, continues to be a prominent and reliable steel manufacturer in South India. The Company's integrated manufacturing unit located at Gummidipoondi, Tamil Nadu, houses both furnace and rolling mill operations, producing a range of frontline rolled steel products. Over the years, the brand "KANISHK STEELS" has earned a reputation in the Indian market for its quality, competitive pricing, and dependable delivery schedules. During FY 2024–25, the Company sustained its focus on enhancing product quality, optimising internal processes, and strengthening its market presence, particularly in the infrastructure and industrial segments.

The per capita finished steel consumption in India was around 82.5 kg in FY 2023–24 (–Ministry of Steel, Annual Report 202324), compared to the global average of 231.3 kg ([World Steel Association, 2024]). This gap reflects the tremendous potential for long-term demand growth in the country. With sustained investment in infrastructure such as roads, ports, airports, renewable energy, and affordable housing, demand for steel is projected to remain strong over the next decade.

That said, the industry also faces challenges. Key risks include volatile input costs (coal, iron ore), exchange rate fluctuations, regional demand–supply imbalances, and high energy and logistics costs. The influx of low-priced steel imports from neighbouring countries such as China and

Vietnam also adds competitive pressure ([DGFT Import Data, FY 2024–25]). Nonetheless, strong domestic policy support through duties, quality controls, and procurement preference for Indian steel has partially offset these pressures.

Despite these challenges, the Company remains optimistic about the future. With steel consumption expected to rise at 7–8% CAGR over the next 5 years ([CRISIL Outlook – Feb 2025]), Kanishk Steel aims to leverage its operational strengths and customer-centric approach to achieve sustainable growth. By maintaining quality standards, cost discipline, and market responsiveness, the Company remains committed to creating long-term value for all stakeholders.

INDEPENDENT AUDITORS' REPORT

To the Members of Kanishk Steel Industries Limited Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of Kanishk Steel Industries Limited (the 'Company'), which comprise the Balance Sheet as at March 31, 2025, the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and notes to the financial statements, including a summary of the material accounting policy information and other explanatory information (hereinafter referred to as "financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 (the 'Act') in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including Indian Accounting Standards ('Ind AS') specified under Section 133 of the Act of the state of affairs of the Company as at March 31, 2025, and its profit including other comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ('ICAI') together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Financial Statements of the current period. These matters were addressed in the context of our audit of the Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have determined the matters described below to be the key audit matters to be communicated in our report. We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the Financial Statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the Financial Statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying Financial Statements:

Key audit matters

How the matter was addressed in our audit

Allowance for credit losses for trade receivables

In determination of allowance for expected credit loss, management's judgement involves consideration of ageing status, historical payment records, evaluation of litigations, the likelihood of collection based on the terms of the contract and the credit information of its customers.

We considered this as key audit matter due to the materiality of the amounts and significant estimates and judgements as stated above.

Our audit procedures included the following:

- We tested the design and operative effectiveness of management's key internal controls over allowance for credit losses.
- We assessed the completeness and accuracy of the information used in the estimation of probability of default and tested historical payment records, correspondence with customers, credit related information and subsequent collection of the customers balances.
- We assessed the allowance for expected credit loss made by management and performed analysis of ageing of receivables, tested the mathematical accuracy and
- · computation of the allowance for credit losses.

Revenue recognition (Refer Note 25 to financial statements of the Company)

Revenue is one of the key profit drivers and is therefore susceptible to misstatement. Cut-off is the key assertion in so far as revenue recognition is concerned, since an inappropriate cut-off can result in material misstatement of results for the year. Principal audit procedure performed:

- Focusing on the Company's revenue recognition for compliance with Ind AS;
- Testing the design, implementation and operating effectiveness of the Company's controls on recording revenue;
- Performing Substantive testing for cut-off with verification of contractual terms of invoices, dispatch/deliveries receipts.
- Inventory reconciliations and circularization of receivable balances and analytical review procedures.
- Our test of details focused on cut-off samples to verify that only revenue pertaining to current year is recognized based on terms and conditions set out in sales contracts and delivery documents.

Information Other than the Financial Statements and Auditors' Report Thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the financial statements and our auditor's report thereon. The Annual report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

When we read the Annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance as required under SA 720 'The Auditor's responsibilities Relating to Other Information'.

Responsibilities of Management for the Financial Statements and those charged with governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these financial statements that give a true and fair view of the state of affairs (financial position), profit or loss (financial performance including other comprehensive income), changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Ind AS specified under Section 133 of the Act read with Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so. The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of Financial statements:

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not
 detecting a material misstatement resulting from fraud is higher than for one resulting from error,
 as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override
 of internal control:
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3) (i) of the Act, we are also responsible for explaining our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls;
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty

exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern; and

• Evaluate the overall presentation, structure and content of the Financial Statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Financial Statements for the financial year ended March 31, 2025 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Annexure B to the Independent Auditor's Report of even date to the members of Kanishk Steel Industries Limited, on the Financial Statements for the year ended March 31, 2025

Report on the Internal Financial Controls under Clause (i) of sub-section 3 of Section 143 of the Companies Act, 2013 (the "Act")

We have audited the internal financial controls with reference to financial statements of Kanishk Steel Industries Limited ("the Company") as of March 31, 2025 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's Board of Directors is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Company's business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to these financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing as specified under section 143 (10) of the Act, to the extent applicable to an audit of internal financial controls, both issued by ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to these financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to these standalone financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to these financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to these standalone financial statements.

Meaning of Internal Financial Controls over Financial Reporting with reference to these financial statements

A company's internal financial controls with reference to standalone financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to standalone financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting with reference to these financial statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, adequate internal financial controls over financial reporting with reference to these financial statements and such internal financial controls over financial reporting with reference to these financial statements were operating effectively as at March 31, 2025, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

KANISHK STEEL INDUSTRIES LIMITED NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2025

1. Corporate Information

Kanishk Steel Industries Limited ("the Company"), having CIN L27109TN1995PLC067863 is engaged in the manufacture and supply of Iron and Steel Products.

The Company was incorporated as private company in the year 1989 under the provisions of Companies Act, 1956 and converted to a public limited company in the year 1995. The Company's shares are listed on the Bombay Stock Exchange Limited and the shares are traded regularly. The registered office of the company is at B27M, SIPCOT Industrial Complex, Gummidipoondi, Thiruvallur District – 601 201, Tamilnadu.

These financial statements have been approved and adopted by the Board of Directors of the Company in their meeting held on May 28, 2025.

2. Basis of preparation and presentation of Financial Statements

a) Statement of Compliance

Financial Statements have been prepared in accordance with the accounting principles generally accepted in India including Indian Accounting Standards (Ind AS) prescribed under the section 133 of the Companies Act, 2013 read with rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and presentation and disclosures requirement of Division II of revised Schedule III of the Companies Act 2013, (Ind AS Compliant Schedule III), as applicable to financial statement.

Accordingly, the Company has prepared these Financial Statements which comprise the Balance Sheet as at March 31, 2025, the Statement of Profit and Loss, the Statement of Cash Flows and the Statement of Changes in Equity for the year ended as on that date, and accounting policies and other explanatory information (together hereinafter referred to "Financial Statements").

Accounting Policies have been consistently applied except where a newly issued Indian Accounting Standard is initially adopted or a revision to an existing Indian Accounting Standard requires a change in the accounting policy hitherto in use.

The financial statements provide comparative information in respect of previous year

The material accounting policies used in preparing the financial statements are set out in note no. 3

b) Functional and Presentation Currency:

The financial statements are presented in Indian Rupees (₹) which is the Company's functional and presentation currency, and all amounts are rounded to the nearest lakh and two decimals thereof, except as otherwise stated.

c) Basis of preparation and presentation

a) The financial statements have been prepared on an accrual basis and in accordance with the historical cost convention, unless otherwise stated. All assets and liabilities are

74 Annual Report

classified into current and non-current generally based on the nature of product/activities of the Company and the normal time between acquisition of assets/ Liabilities and their realisation/settlement in cash or cash equivalent. The Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

b) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes in account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 116, fair value of plan assets within scope the of Ind AS 19 and measurements that have some similarities to fair value but are not fair value, such as net realizable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurements in its entirety, which are described as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 inputs are inputs, other than quoted prices included within level 1, that are observable for the asset or liability, either directly or indirectly; and

Level 3 inputs are unobservable inputs for the asset or liability. The Financial Statement is presented in INR and all values are rounded to the nearest lakhs except when otherwise stated.

c) Current and non-current classification

The Company presents assets and liabilities in the balance sheet based on current / noncurrent classification.

An asset is classified as current when it satisfies any of the following criteria:

- It is expected to be realized in, or is intended for sale or consumption in, the Company's normal operating cycle. it is held primarily for the purpose of being traded;
- It is expected to be realized within 12 months after the reporting date; or
- It is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.

2024-2025 75

All other assets are classified as non-current.

A liability is classified as current when it satisfies any of the following criteria:

- it is expected to be settled in the Company's normal operating cycle;
- · it is held primarily for the purpose of being traded;
- it is due to be settled within 12 months after the reporting date; or the Company does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.
- · All other liabilities are classified as non-current.
- The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified 12 months as its operating cycle.
- Deferred tax assets and liabilities are classified as noncurrent only.

3. Material Accounting Policies Information

The principal accounting policies applied in the preparation of the financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated

a) Property, Plant and Equipment (PPE)

Property, plant and equipment including bearer assets are carried at historical cost of acquisition or deemed cost less accumulated depreciation and accumulated impairment loss, if any. Historical cost includes its purchase price, including import duties and non-refundable purchase taxes after deducting trade discounts and rebates and any cost directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Subsequent expenditure related to an asset is added to its book value only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All repairs and maintenance are charged to the Statement of Profit and Loss during the financial year in which these are incurred.

The company's lease Land has been separately shown under PPE as Right of Use (ROU) Assets. Capital Work-in-progress includes developmental expenses, equipment to be installed, construction and erection materials etc. Such costs are added to related PPE and are classified to the appropriate categories when completed and ready for intended use.

b) Capital work-in-progress:

Expenditure related to and incurred on implementation of new/ expansion-cum-modernisation projects is included under capital work-in-progress until the relevant assets are ready for its intended use. All other expenditure (including trial run / test run expenditures) during construction / erection period (net of income) are shown as part of pre-operative expenditure pending allocation / capitalization and the same is allocated to the respective asset on completion of its construction/ erection.

c) Intangible assets

Software costs are included in the balance sheet as intangible assets when it is probable that associated future economic benefits would flow to the Company. In this case they are measured initially at purchase cost and then amortized on a straight-line basis over their estimated useful lives. All other costs on patents, trademarks and software are expensed in the statement of profit and loss as and when incurred.

Expenditure on research activities is recognized as an expense in the period in which it is incurred. Costs incurred on individual development projects are recognized as intangible assets from the date when all of the following conditions are met:

- a. Completion of the development is technically feasible.
- b. It is the intention to complete the intangible asset and use or sell it.
- c. Ability to use or sell the intangible asset.
- d. It is clear that the intangible asset will generate probable future economic benefits.
- e. Adequate technical, financial and other resources to complete the development and to use or sell the intangible asset are available.
- f. It is possible to reliably measure the expenditure attributable to the intangible asset during its development.

Recognition of costs as an asset is ceased when the project is complete and available for its intended use, or if these criteria are no longer applicable.

Where development activities do not meet the conditions for recognition as an asset, any associated expenditure is treated as an expense in the period in which it is incurred.

Subsequent to initial recognition, intangible assets with definite useful lives are reported at cost or deemed cost applied on transition to Ind AS, less accumulated amortization and accumulated impairment losses.

Cost of computer software packages including directly attributable cost, if any, acquired for internal use, is allocated / amortized over a period of 3 years (being estimated useful life thereof) on Straight line method.

d) Leases

The Company's lease asset classes primarily consist of Lease hold land. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements include the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities include these options considered for arriving at ROU and lease liability when it is reasonably certain that they will be exercised.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates of these leases. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Company changes its assessment, whether it will exercise an extension or a termination option.

The right-of-use assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses.

The company has taken land on long term lease. There are no commitment towards monthly/yearly lease payments accordingly lease liability and its corresponding disclosures does not arise.

Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. Right of use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

e) Depreciation and amortization of property, plant and equipment and intangible assets

Depreciation or amortization is provided so as to write off, on a straight-line basis, the cost/deemed cost of property, plant and equipment and intangible assets, including those held under finance leases to their residual value. These charges are commenced from the dates the assets are available for their intended use and are spread over their estimated useful economic lives or, in the case of leased assets, over the lease period, if shorter. The estimated useful lives of assets, residual values and depreciation method are reviewed regularly and, when necessary, revised.

Depreciation on assets under construction commences only when the assets are ready for their intended use. The estimated useful lives for main categories of property, plant and equipment and intangible assets are:

Category	Useful life(Years)
Factory Building	30
Plant & Machinery	8 - 20
Electrical installation	10
Furniture and fixtures	10
Vehicles	8
Crane	20
Office equipment	5

Land and building held for use in the production or for administrative purposes are stated in the balance sheet at cost less accumulated depreciation and accumulated impairment losses. Freehold land is not depreciated.

Right-of-use assets (ROU) are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset.

Capital work in progress includes machinery to be installed, construction and erection materials and unallocated pre-operative expenditure consisting of costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

The cost of replacing part of an item of property, plant and equipment or subsequent expenditure on Property, Plant and Equipment arising on account of capital improvement or other factors are accounted for as separate components. The costs of the day-to-day servicing of property, plant and equipment are recognized in the income statement when incurred. Assets to be disposed of are reported at the lower of the carrying value or the fair value less cost to sell

Assets values up to ₹5,000 are fully depreciated in the year of acquisition..

Depreciation methods, useful lives and residual values are reviewed, and adjusted as appropriate, at each reporting date.

f) Impairment

At each balance sheet date, the Company reviews the carrying value of its property, plant and equipment and intangible assets to determine whether there is any indication that the carrying value of those assets may not be recoverable through continuing use. If any such indication exists, the recoverable amount of the asset is reviewed in order to determine the extent of impairment loss, if any. Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-taxdiscount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. An impairment loss is recognized in the statement of profit and loss as and when the carrying value of an asset exceeds its recoverable amount.

Where an impairment loss subsequently reverses, the carrying value of the asset (or cash generating unit) is increased to the revised estimate of its recoverable amount so that the increased carrying value does not exceed the carrying value that would have been determined had no impairment loss been recognized or the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognized in the statement of profit and loss immediately.

g) De-recognition of Tangible and Intangible Assets

An item of PPE/Intangible Assets is de-recognized upon disposal or when no future economic benefits are expected to arise from its use or disposal. Gain or loss arising on the disposal or retirement of an item of PPE is determined as the difference between the sale proceeds and the carrying amount of the asset and is recognized in the Statement of Profit and Loss.

h) Impairment of Tangible and Intangible Assets

Tangible, Intangible assets and ROU Assets are reviewed at each balance sheet date for impairment. In case events and circumstances indicate any impairment, recoverable amount of assets is determined. An impairment loss is recognized in the statement of profit and loss, whenever the carrying amount of assets either belonging to Cash Generating Unit (CGU) or otherwise exceeds recoverable amount. The recoverable amount is the higher of assets' fair value less cost to disposal and its value in use. In assessing value in use, the estimated future cash flows from the use of the assets are discounted to their present value at appropriate rate. Impairment losses recognized earlier may no longer exist or may have come down. Based on such assessment at each reporting period the impairment loss is reversed and recognized in the Statement of Profit and Loss. In such cases the carrying amount of the asset is increased to the lower of its recoverable amount and the carrying amount that have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years that reflects current market assessments of the time value of money and the risk specific to the asset.

i) Non-current assets held for sale:

The Company classifies non-current assets as held for sale if their carrying amounts will be recovered principally through a sale rather than through continuing use. This condition is regarded as met only when the asset is available

for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset and its sale is highly probable. Also, such assets are classified as held for sale only if the management expects to complete the sale within one year from the date of classification. Non-current assets classified as held for sale are measured at the lower of their carrying amount and the fair value less cost to sell, except for financial assets which are measured as per Ind AS 109 "Financial Instruments". Non-current assets are not depreciated or amortised

i) Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

i. Non- Derivative Financial Instruments

a. Initial Recognition

The Company recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument. All financial assets and liabilities are recognized at fair value on initial recognition. Trade Receivables are initially recognised at transaction price where that do not contain any significant portion of financing component.

Transaction costs that are directly attributable to the acquisition or release of financial assets and financial liabilities respectively, which are not at fair value through profit or loss, are added to the fair value of underlying financial assets and liabilities on initial recognition. Trade receivables and trade payables that do not contain a significant financing component are initially measured at their transaction price.

b. Subsequent Measurement

Financial assets carried at amortised cost

A financial asset is subsequently measured at amortised cost which is held with objective to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

c. Financial assets at fair value through other comprehensive income

A financial asset is subsequently measured at fair value through other comprehensive income which is held with objective to achieve both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

d. Financial assets at fair value through profit or loss

A financial asset which is not classified in any of the above categories are subsequently fair valued through profit or loss. The Company has elected to measure its investments which are classified as equity instruments (other than investment in shares of Subsidiaries, Joint Ventures and Associates) at fair value through profit and loss account.

e. Impairment of financial assets

The Company recognizes loss allowances using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. For impairment purposes significant financial assets are tested on an individual basis, other financial assets are assessed collectively in groups that share similar credit risk characteristics.

The Company recognises lifetime expected losses for all trade receivables. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the lifetime expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition. Any adjustment required to align the loss allowance with the expected credit losses at the reporting date, whether an increase or a reversal, is recognized as an impairment gain or loss in profit or loss.

The Company follows 'simplified approach' for the recognition of impairment loss allowance on trade and other receivables. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

The Company uses a provision matrix to determine impairment loss allowance on portfolio of its trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the receivables and is adjusted for forward-looking estimates. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

f. Financial liabilities at amortised cost

Financial liabilities are subsequently carried at amortized cost using the effective interest method. Financial liabilities at fair value through profit and loss includes financial liability held for trading and financial liability designated upon initial recognition as at fair value through profit and loss.

ii. Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

iii. Reclassification of financial assets

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the company either begins or ceases to perform an activity that is significant to its operations. If the company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

iv. Derivatives and Hedge Accounting

The company enters into derivative financial instruments such as foreign exchange forward contracts to mitigate the risk of changes in foreign exchange rates in respect of financial instruments and forecasted cash flows denominated in certain foreign currencies. The Company uses hedging instruments which provide principles on the use of such financial derivatives consistent with the risk management strategy of the Company. The hedge instruments are designated and documented as hedges and effectiveness of hedge instruments is assessed and measured at inception and on an ongoing basis to reduce the risk associated with the exposure being hedged.

Any derivative that is either not designated as a hedge, or is so designated but is ineffective as per Ind AS 109 "Financial Instruments", is categorized as a financial asset/liability, at fair value through profit or loss. Transaction costs attributable to the same are also recognized in statement of profit and loss.

Derivative instruments are initially recognized at their fair values on the date on which a derivative contract is entered into and are subsequently re-measured at fair value on each reporting date. Changes in the fair value of the derivative hedging instrument designated as a fair value hedge are recognized in the statement of profit and loss. Changes in the fair value of the derivative hedging instrument designated as a cash flow hedge are recognized in other comprehensive income and presented within equity as cash flow hedging reserve to the extent that the hedge is effective.

Hedging instrument which no longer meets the criteria for hedge accounting, expires or is sold, terminated or exercised, then hedge accounting is discontinued prospectively. Any gain or loss recognised in other comprehensive income and accumulated in equity remains therein till that time and thereafter to the extent hedge accounting being discontinued is recognised in Statement of Profit and Loss. When a forecasted transaction is no longer expected to occur, the cumulative gain or loss accumulated in equity is transferred to the statement of profit and loss

v. De-recognition of financial instruments

The Company derecognizes a financial asset or a group of financial assets when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On de-recognition of a financial asset, the difference between the asset's carrying amounts and the sum of the consideration received and receivable are recognized in statement of profit and loss.

On de-recognition of assets measured at FVTOCI the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to statement of profit and loss as a reclassification adjustment.

Financial liabilities are derecognized if the Company's obligations specified in the contract expire or are discharged or cancelled. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in statement of profit and loss.

k) Cash and cash equivalents

All highly liquid financial instruments, which are readily convertible into determinable amounts of cash and which are subject to an insignificant risk of change in value and are having original maturities of three months or less from the date of purchase, are considered as cash equivalents. Cash and cash equivalents includes balances with banks which are unrestricted for withdrawal and usage.

I) Inventories

- i. Inventories are valued at lower of the cost or net realizable value. Cost of inventories is ascertained on 'weighted average' basis. Materials and her supplies held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost.
- ii. Cost in respect of raw materials and stores and spares includes expenses incidental to procurement of the same. Cost of finished goods and those under progress represents raw material cost plus costs of conversion, comprising labour costs and an attributable proportion of manufacturing overheads based on normal levels of activity. proportion of manufacturing overheads based on normal levels of activity.
- iii. Cost in respect of work in progress represents cost incurred up to the stage of completion.
- iv. By-Products are valued at net realizable value
- v. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

m) Foreign Currency Transactions

Transactions in foreign currencies are translated into the functional currency at the exchange rates prevailing on the date of the transactions. Foreign currency monetary assets and liabilities at the year-end are translated at the year-end exchange rates. Non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of transaction. The loss or gain thereon and also on the exchange differences on settlement of the foreign currency transactions during the year are recognized as income or expense in the profit and loss account. Foreign exchange gain/loss to the extent considered as an adjustment to Interest Cost are considered as part of borrowing cost.

n) Equity Share Capital

An equity instrument is a contract that evidences residual interest in the assets of the company after deducting all of its liabilities. Par value of the equity shares is recorded as share capital and the amount received in excess of par value is classified as Securities Premium. Costs directly attributable to the issue of ordinary shares are recognized as a deduction from equity, net of any tax effects

o) Provisions, Contingent Liabilities and Contingent Assets

Provisions involving substantial degree of estimation in measurement are recognized when there is a legal or constructive obligation as a result of past events and it is probable that there will be an outflow of resources and a reliable estimate can be made of the amount of obligation. Provisions are not recognized for future operating losses. The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

Contingent liabilities is not recognized and are disclosed by way of notes to the financial statements when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or when there is a present obligation is not recognised where it is either not probable that an outflow of resources will be required to settle the same or a reliable estimate of the amount payable in this respect cannot be made.

Contingent Assets are not recognised but disclosed in the financial statements by way of notes to accounts when an inflow of economic benefits is probable.

p) Employee Benefits

i. Short term Employee Benefits:

All employee benefits payable within twelve months of rendering the service are classified as short-term employee benefits. Such Employee Benefits are recognized as expenses as and when it accrues.

Post-Employment Benefits:

Defined Contribution plans

Company's contribution to Provident Fund and ESI are charged to the statement of Profit & Loss during the period in which the employee renders the related service. The Company has no obligations other than the contributions payable to the respective funds.

Defined Benefit plans

Gratuity: Gratuity liability is provided for based on actuarial valuation made at the end of each financial year using the projected unit credit method in accordance with the Indian Accounting Standard. Actuarial gain and losses are recognized immediately in the statement of Profit & Loss as income or expenses.

Re-measurements gains and losses arising from experience adjustments and changes in actuarial assumption are recognized in the period in which they occur, directly in other comprehensive income, which is included in retained earnings in the statement of changes in equity and in the balance sheet.

q) Revenue Recognition

The Company manufactures and sells Iron and Steel Products.

i. Sale of goods

The Company recognises revenue when control over the promised goods or services is transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has generally concluded that it is the principal in its revenue arrangements as it typically controls the goods or services before transferring them to the customer.

Revenue is adjusted for variable consideration such as discounts, rebates, refunds, credits, price concessions, incentives, or other similar items in a contract when they are highly probable to be provided. The amount of revenue excludes any amount collected on behalf of third parties. The Company recognises revenue generally at the point in time when the products are delivered to customer or when it is delivered to a carrier for export sale, which is when the control over product is transferred to the customer. In contracts where freight is arranged by the Company and recovered from the customers, the same is treated as a separate performance obligation and revenue is recognised when such freight services are rendered. In revenue arrangements with multiple performance obligations, the Company accounts for individual products and services separately if they are distinct—i.e. if a product or service is separately identifiable from other items in the arrangement and if a customer can benefit from it. The consideration is allocated between separate products and services in the arrangement based on their stand-alone selling prices. Revenue from sale of by products are included in revenue. Revenue from sale of power is recognised when delivered and measured based on the bilateral contractual arrangements.

r) Contract balances

i. Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration.

ii) Trade receivables

A receivable is recognised when the goods are delivered and to the extent that it has an unconditional contractual right to receive cash or other financial assets (i.e., only the passage of time is required before payment of the consideration is due). Trade receivables is derecognised when the Company transfers substantially all the risks and rewards of ownership of the asset to another party including discounting of bills on a non-recourse basis.

iii) Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract including Advance received from Customer.

vi. Refund liabilities

A refund liability is the obligation to refund some or all of the consideration received (or receivable) from the customer and is measured at the amount the Company ultimately expects it will have to return to the customer including volume rebates and discounts. The Company updates its estimates of refund liabilities at the end of each reporting period.

s) Other Income

i. Claims receivable

The quantum of accruals in respect of claims receivable such as from insurance, customs, excise and the like are accounted for on accrual basis to the extent there is reasonable certainty of realization.

ii. Dividend Income from Investment

Dividend income from investments is recognised when the right to receive payment has been established.

iii. Interest Income

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate. Interest income is netted off from interest cost under the head "Interest Cost (Net)" in the statement of profit and loss.

t) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for the intended use or sale.

Investment income earned on temporary investment of specific borrowings pending their expenditure on qualifying assets is recognized in the statement of profit and loss.

Discounts or premiums and expenses on the issue of debt securities are amortized over the term of the related securities and included within borrowing costs. Premiums payable on early redemptions of debt securities, in lieu of future finance costs, are recognized as borrowing costs.

All other borrowing costs are recognized as expenses in the period in which it is incurred.

u) Income Tax:

Income tax expense comprises current tax and the net change in deferred tax assets and liabilities during the year. Current and deferred tax are recognised in the Statement of Profit and Loss, except when they relate to items that are recognised in Other Comprehensive Income (OCI) or directly in equity, in which case the related tax is also recognised in OCI or directly in equity respectively.

Current Tax

Current tax is the amount of income tax payable on the taxable profit for the year, determined in accordance with the provisions of the Income-tax Act, 1961. The Company has opted for the concessional tax regime under section 115BAA of the Act, and accordingly, current tax is computed using the tax rate prescribed under this regime. The current tax charge is measured based on tax laws enacted or substantively enacted at the reporting date.

Deferred Tax

Deferred tax is recognised using the balance sheet approach, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are recognised to the extent that it is probable that sufficient future taxable profits will be available against which deductible temporary differences, unused tax credits, and unused tax losses can be utilised.

Deferred tax is measured using the tax rates and laws that have been enacted or substantively enacted by the reporting date and are expected to apply when the related deferred tax asset is realised or liability is settled, considering the Company's continued option to be taxed under section 115BAA. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available. Unrecognised deferred tax assets are reassessed at each reporting date and recognised when their recovery becomes reasonably certain.

Offsetting

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities, and when they relate to income taxes levied by the same taxation authority on the same taxable entity. Current tax assets and liabilities are also offset when the Company intends to settle them on a net basis or to realise the asset and settle the liability simultaneously.

v) Earnings per share

Basic earnings per share is computed by dividing profit or loss for the year attributable to equity holders by the weighted average number of shares outstanding during the year. Partly paid-up shares are included as fully paid equivalents according to the fraction paid up.

Diluted earnings per share are computed using the weighted average number of shares and dilutive potential shares except where the result would be anti-dilutive.

w) Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

The Board of directors of the Company has been identified as the Chief Operating Decision Maker which reviews and assesses the financial performance and makes the strategic decisions.

x) Corporate Social Responsibility ('CSR') expenditure

The Company charges its CSR expenditure during the year to the statement of profit and loss.

y) Statement of Cash Flow

Cash Flows are reported using indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals and accruals of past or future operating cash receipts and payments and item of income and expenses associated with investing or financing cash flows. The cash flows from operating, investing, and financing activities of the company are segregated.

z) Significant Events after the Reporting Period

The Company has evaluated events occurring after the reporting date up to the date of approval of these financial statements by the Board of Directors, May 28, 2025. There were no events that require adjustment to, or disclosure in, these financial statements in accordance with Ind AS 10 Events after the Reporting Period.

4. Recent Accounting Pronouncements

New Accounting standards, amendments and interpretations adopted by the Company (wherever applicable) effective from April 1, 2023:

Recent accounting pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. During the year ended March 31, 2025, MCA has notified Ind AS 117 - Insurance Contracts and amendments to Ind As 116 – Leases, relating to sale and lease back transactions, applicable from April 1, 2024. The Company has assessed that there is no significant impact on its financial statements.

On May 9, 2025, MCA notifies the amendments to Ind AS 21 - Effects of Changes in Foreign Exchange Rates. These amendments aim to provide clearer guidance on assessing currency exchangeability and estimating exchange rates when currencies are not readily exchangeable. The amendments are effective for annual periods beginning on or after April 1, 2025. The Company is currently assessing the probable impact of these amendments on its financial statements.

5. Critical Accounting Estimates, Judgments and Assumptions

The preparation of the financial statements in conformity with measurement principle of Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Differences between the actual results and estimates are recognized in the year in which the results are known / materialized and, if material, their effects are disclosed in the notes to the financial statements.

Application of accounting policies that require significant areas of estimation, uncertainty and critical judgments and the use of assumptions in the financial statements have been disclosed below. The key assumptions concerning the future and other key sources of estimation/assumptions at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities and related revenue impact within the next financial year are discussed below:

a) Depreciation/amortization and impairment loss against property, plant and equipment / intangible assets.

Property, plant and equipment, ROU Assets and Intangible Assets are depreciated/ amortized on straight-line basis over the estimated useful lives (or lease term if shorter) taking into account the estimated residual value, wherever applicable. The company reviews its carrying value of its Tangible and Intangible Assets whenever there is objective evidence that the assets are impaired.

88 Annual Report

The required level of impairment losses to be made is estimated by reference to the estimated value in use or recoverable amount. In such situation Assets' recoverable amount is estimated which is higher of asset's or cash generating units (CGU) fair value less cost of disposal and its value in use. In assessing value in use the estimated future cash flows are discounted using pre-tax discount rate which reflect the current assessment of time value of money. In determining fair value less cost of disposal, recent market realisations are considered or otherwise in absence of such transactions appropriate valuations are adopted. The Company reviews the estimated useful lives and residual life of the assets regularly in order to determine the amount of depreciation / amortization and also amount of impairment expense to be recorded and/or to be reversed during any reporting period. Subsequent reassessment or review may result in change of estimates in future periods.

b) Arrangement contain leases and classification of leases

Ind AS 116 requires lessees to determine the lease term as the non- cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The Company makes an assessment on the expected lease term on a lease-by-lease basis and thereby assesses whether it is reasonably certain that any option to extend or terminate the contract will be exercised. In evaluating the lease term, the Company considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of the lease and the importance of the underlying asset to the company's operations taking into account among other things, the location of the underlying asset and the availability of suitable alternatives. The lease terms and impact thereof are reassessed in each year to ensure that the lease term reflects the current economic circumstances.

c) Impairment loss on trade receivables

The Company evaluates whether there is any objective evidence that trade receivables are impaired and determines the amount of impairment loss as a result of the inability of the debtors to make required payments. The Company bases the estimates on the ageing of the trade receivables balance, credit-worthiness of the trade receivables and historical write-off experience.

d) Defined Benefit Obligations (DBO)

Critical estimate of the DBO involves a number of critical underlying assumptions such as standard rates of inflation, mortality, discount rate, anticipation of future salary increases etc. as estimated by Independent Actuary appointed for this purpose. Variation in these assumptions may significantly impact the DBO amount and the annual defined benefit expenses.

e) Provisions and Contingencies

Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability requires the application of judgement to existing facts and circumstances, which can be subject to change.

Management uses in-house and external legal professional to make judgment for estimating the possible outflow of resources, if any, in respect of contingencies/claim/litigations/ against the Company as it is not possible to predict the outcome of pending matters with accuracy.

The carrying amounts of provisions and liabilities and estimation for contingencies are reviewed regularly and revised to taking into account changing facts and circumstances.

33. EMPLOYEE BENEFITS:

I. Defined contribution plans

The Company participates in a number of defined contribution plans on behalf of relevant personnel. Any expense recognized in relation to these schemes represents the value of contributions payable during the period by the Company at rates specified by the rules of those plans. The only amounts included in the balance sheet are those relating to the prior months contributions that were not due to be paid until after the end of the reporting period. The major defined contribution plans operated by the Company are as below:

(a) Provident and pension

The Company provides provident fund benefits for eligible employees as per applicable regulations wherein both employees and the Company make monthly contributions at a specified percentage of the eligible employee's salary. Contributions under such schemes are made either to a provident fund set up as an irrevocable trust by the Company to manage the investments and distribute the amounts entitled to employees or to state managed funds.

Benefits provided under plans wherein contributions are made to state managed funds and the Company does not have a future obligation to make good shortfall if any, is treated as a defined contribution plan

(b) Gratuity

Contributions under the scheme for defined benefit plan under the Payment of Gratuity Act, 1972, is determined on the basis of actuarial valuation recognized as year's expenditure. Actuarial gain and losses arising from experience adjustments and changes in actuarial assumptions are recognized in other comprehensive income. Other costs recognized in the Statement of Profit or Loss.

II. Defined benefit obligation(DBO):

Critical estimate of the DBO involves a number of critical underlying assumptions such as standard rates of inflation, mortality, discount rate, anticipation of future salary increases etc. as estimated by Independent Actuary appointed for this purpose/ Management. Variation in these assumptions may significantly impact the DBO amount and the annual defined benefit expenses.

(b) Fair Valuation Techniques

The fair values of the financial assets and liabilities are included at the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The following methods and assumptions were used to estimate the fair values:

- i The fair value of cash and cash equivalents, trade receivables, trade payables, current financial liabilities and borrowings approximate their carrying amount largely due to the short-term nature of these instruments. The Board considers that the carrying amounts of financial assets and financial liabilities recognized in the financial statement approximate their fair value.
- ii. Long-term debt has been contracted at floating rates of interest, which are reset at short intervals. Fair value of variable interest rate borrowings approximates their carrying value of such long-term debt approximates fair value subject to adjustments made for transaction cost.
- iii. The fair value of derivative financial instruments is determined based on observable market inputs including currency spot and forward rates, yield curves, currency volatility etc. These derivatives are estimated by using the pricing models, where the inputs to those models are based on readily observable market parameters basis contractual terms, period to maturity, and maturity parameters such as foreign exchange rates and volatility. These models do not contain a high level of subjectivity as the valuation techniques used do not require significant judgement, and inputs thereto are readily observable from actively quoted market prices. Management has evaluated the credit and a non-performance risk associated with the counterparties and believes them to be insignificant and not requiring any credit adjustments.

(C) Fair value hierarchy

The Company categorizes assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement which are described as follows:

Figures in round brackets () indicate figures as on March 31, 2024

During the year ended March 31, 2025 and March 31, 2024, there were no transfers between Level 1 and Level 2 fair value measurements. There is no transaction / balance under level 3.

The fair value of liquid mutual funds is based on quoted price.

Derivative financial instruments are valued based on quoted prices for similar assets and liabilities in active markets or inputs that are directly or indirectly observable in the marketplace. The inputs used under level II market valuation technique for forward contracts are Forward foreign currency exchange rates and Interest rates to discount future cash flow.

38. DERIVATIVES ASSETS AND LIABILITIES:

The Company follows established risk management policies, including the use of derivatives to hedge its exposure to foreign currency fluctuations on foreign currency assets / liabilities. The counter party in these derivative instruments is a bank and the Company considers the risks of non-performance by the counterparty as non-material. The following table presents the aggregate contracted principal amounts of the Company's derivative contracts outstanding:

(c) Financial risk management

Financial Risk Factors

The company's activities expose it to a variety of financial risks – Market risk, Credit risk and liquidity risk. The Company's focus is to foresee the unpredictability of financial markets and seek to minimise potential adverse effects on its financial performance. The primary market risk to the company is foreign exchange risk. The company uses derivative financial instruments to mitigate foreign exchange related risk exposures. The company's exposure to credit risk is influenced mainly by the individual characteristic of each customer and the concentration of risk from the top few customers. The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The risks are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and approves policies for managing each of these risks, which are summarized below:

i. Market Risk

Market risk is the risk or uncertainty arising from possible market price movements resulting in fluctuation of the fair value of future cash flows of a financial instrument. The major components of Market risks are price risk, interest rate risk and foreign currency exchange risk. Financial instruments affected by market risk includes borrowings, investments and derivative financial instruments

ii. Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's foreign currency denominated borrowing.

The Company evaluates exchange rate exposure arising from these transactions and enters into foreign currency derivative instruments to mitigate such exposure. The Company follows established risk management policies, including the use of derivatives like foreign exchange forward / option contracts to hedge forecasted cash flows denominated in foreign currency.

As per the hedging policy of the Company, all foreign currency exposures that are due in the next 12 months are either hedged or based on the technical assessment of foreign currency movement against the INR and the premium charged for the hedging, the same might be left un-hedged so as to avail maximum financial benefit to the company. The carrying amount of the Non-Derivative financial instruments in foreign currency as of the end of the reporting period is Nil (Previous year Nil)

The company is principally exposed to foreign currency risk against USD. Sensitivity of profit or loss arises mainly from USD denominated receivables and payables are as follows:

Sensitivity at year end for March 31, 2025

Particulars	Impact on profit after tax	Impact on other components of equity

Other Income: Net foreign exchange	84.49	52.45

iii. Commodity price risk

The company uses scrap metals which exposes it to be price risk on account of procurement of commodities. The management monitors commodities / raw materials whose prices are volatile and suitable steps are taken accordingly to minimise the risk on the same. The company enter into contract for procurement of material, most of the transactions are short term fixed price contract and a few transactions are long term fixed price contracts.

iv. Interest rate risk

Interest rate risk primarily arises from floating rate borrowing with banks and financial institutions. As of March 31, 2025, substantially all of the Company borrowings were subject to floating interest rates, which are reset at short intervals.

v. Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables). To manage this, the management has a credit policy in place and the exposure to credit risk is monitored on an on-going basis. The Company periodically assesses the financial reliability of customers, taking into account the financial condition, current economic trends and ageing of accounts receivable. Individual risk limits are set accordingly.

The Company establishes an allowance for impairment that represents its estimate of incurred losses in respect of trade and other receivables. Receivables from customers are reviewed/evaluated periodically by the management and appropriate provisions are made to the extent recovery there against has been considered to be remote.

The carrying amount of respective financial assets recognized in the financial statements, (net of impairment losses) represents the Company's maximum exposure to credit risk.

The Company is exposed to credit risk from its operating activities (primarily trade receivables). The Company generally deals with parties which have good credit rating / worthiness given by external rating agencies or based on Company's internal assessment as listed below:

Particulars	March 31, 2025	March 31, 2024
Trade Receivables	1,783.74	2,137.63

Refer note no.38(c) for credit risk and other information in respect of trade receivables Cash and cash equivalents, investment and deposits with banks are neither past due nor impaired. Cash and cash equivalents with banks are held with reputed and credit worthy banking institutions.

vi. Counter-party risk

Counterparty risk encompasses settlement risk on derivative and money market contracts and credit risk on demand and time deposits. Settlement and credit risk is reduced by the policy of entering transactions with counterparties that are usually banks or financial institutions with acceptable credit ratings. Exposure to these risks are closely monitored and maintained within predetermined parameters. There are limits on credit exposure to any financial institution. The limits are regularly assessed and determined based upon credit analysis including financial statements and capital adequacy ratio reviews. In addition, net settlement agreements are contracted with significant counterparties.

vii. Liquidity risk

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at a reasonable price. The Company is responsible for liquidity, funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. The Company monitors its liquidity risk and maintains a level of cash and cash equivalents deemed adequate by management to finance the Company's operations and to mitigate the effects of fluctuations in cash flows.

The company relies on mix of borrowings, capital infusion and excess operating cash flows to meet its need for funds. The current committed limits are sufficient to meet its short and medium-term requirements. The company ensures that it does not breach any financial covenants stipulated by the lender. In the event of breach of covenants the Company may be liable to pay additional interest. The Company also ensures that it has sufficient cash on demand to meet expected operational expenses. As of March 31, 2025, the cash and cash equivalents are held with major banks.

39. CAPITAL MANAGEMENT:

The primary objective of the Company's capital management is to ensure that it maintains a healthy capital ratio in order to support its business and maximise shareholder value. The Company's objective when managing capital is to safeguard their ability to continue as a going concern so that they can continue to provide returns for shareholders and benefits for other stake holders. The Company focused on keeping strong total equity base to ensure independence, security, as well as a high financial flexibility for potential future borrowings, if required without impacting the risk profile of the Company.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would thereby permit the banks/financial institutions to immediately call loans and borrowings. The Company has complied with these covenants and there have been no breaches in the financial covenants of any interest-bearing loans and borrowings in the current period.

No changes were made in the objectives, policies or processes for managing capital during the years ended March 31, 2025 and March 31, 2024.

The Company's audit committee reviews the capital structure of the Company on periodic basis. As part of this review, the committee considers the cost of capital and the risks associated with the same.

The company also monitors capital using gearing ratio which is net debt divided by total capital. The gearing ratios as at March 31, 2025 and March 31, 2024 are as follows:

(Rs. in Lakhs)

Particulars	As at March 31, 2025	As at March 31, 2024
